SUMMARY

Skilled in MERN stack with experience in building responsive web apps. Passionate about writing clean, optimized code and learning modern web technologies.

EDUCATION

Btech, Shri Ram Institue of Science and Technology,RGPV (GPA: 8.35)

Jan '17 — Jan '21
Jabalpur, Madhya Pradesh

PROJECTS

Expense Tracker App [Link](#)

- Developed a full-stack web app to track expenses, income, and savings.
- Implemented user signup/signin with secure authentication using JWT and bcrypt.
- Added password reset functionality using UUID- based links.
- Built separate UI and features for premium vs non- premium users.
- Integrated Cashfree Payment Gateway to enable users to upgrade to premium.
- Premium users can download expenses, view download history, and access leaderboard.
- Deployed on AWS EC2 using PM2 and Nginx, with CI/CD pipeline for automated updates.

Ecommerce BuyBusy - Full Stack [Link](#)

- Built a full-stack e-commerce platform with React, Redux, Node.js, Express, and MongoDB.
- Implemented JWT authentication (sign up, login, logout) for secure user access.
- Developed product management (search, filter, responsive UI with Bootstrap).
- Designed shopping cart & order tracking with add/remove, quantity updates, and purchase history.
- Managed global state with Redux + Thunk and integrated REST APIs via Axios.
- Modeled data with Mongoose ODM; deployed frontend on Netlify and backend on Render.

Job Stacker - Job Portal Web App [Link](#)

- Full-stack platform for job seekers and recruiters to connect
- Applicants can create profiles, upload resumes, apply for jobs, and track applications
- Recruiters can post jobs, view applicant insights, and download resumes
- Includes premium features like profile priority, view counts, and resume download tracking
- Admin dashboard for managing users, jobs, and platform activity
- Role-based access control for applicants, recruiters, and admins
- Profile picture , Resume upload/download managed with Multer, for images used Cloudinary.
- Deployed on Render.

Group Chat Application [Link](#)

- Developed a real-time group chat app using MVC architecture with Node.js and Express.
- Users can create/delete groups, chat in real time, and manage group members.
- Implemented admin roles to add/remove users and assign additional admins.
- Used Socket.io for real-time communication and Sequelize for database modeling.

SKILLS

Frontend Web JavaScript, HTML, CSS, Typescript, React.js, Redux/Context API, React Router, Hooks, Custom Hooks, bootstrap

Backend APIs Node.js, Express.js, RESTful APIs, JWT, socket.io

Databases MongoDB, MySQL, Sequelize, Mongoose

Tools Platforms Git, GitHub, VS Code, Razorpay Integration, Cashfree PG, AWS S3, cloudinary

Deployment Cloud PM2, Nginx, CI/CD Pipelines, Render, AWS EC2, AWS RDS
